MEMORANDUM FOR: Deputy Director of Central Intelligence

VIA: Director, Intelligence Community Staff
Deputy Director, Intelligence Community Staff *2/1* 1 JUL 1983

25X1 FROM: [] Executive Secretary
Electronic Information Security Steering Group

SUBJECT: Summary of First Steering Group Meeting

25X1 1. Attached for your signature is a proposed memorandum to the steering group members summarizing the activities of our first meeting. [] and I feel that it is appropriate to respond to the comments made by the members and to proceed with the effort as soon as possible.

2. The identification of "critical systems" is understood by the members to be a most sensitive issue and will take some hand holding. Clearly the producers of intelligence should be the first to come forward and once the users are convinced you mean business they will also participate. You should expect this task to take a couple of cycles before everyone is forthcoming and committed.

25X1 3. The issue of how to prepare a threat briefing that will be convincing without jeopardizing current operations will be looked after by Evan Hineman, []

25X1 4. Request your signature on the attachment.

The Deputy Director of Central Intelligence

Washington, D. C. 20505

MEMORANDUM FOR: Executive Steering Group for the Electronic
Information Security Project

SUBJECT: Summary of First Steering Group Meeting

25X1 1. Your comments and suggestions at our first meeting on 27 June 1983 regarding the proposed tasks identified by [] and her project team are most appreciated. The tasks that we have agreed to are complex, but there is a sense of urgency about getting on with this project. (C)

25X1 2. [] will incorporate your recommendations into her revised project plans. Based on the comments provided at the meeting, the scope of the effort (Issue 1) will be bounded as follows:

- o Exclude stand-alone word processors (initially)
- o Exclude single-user systems such as remote sensing equipment
- o Include computer systems and telecommunications systems utilizing computers that serve multiple users
- o Initially include those automated systems processing sensitive compartmented intelligence (SCI) and automated systems processing collateral intelligence information that could compromise sensitive methods and sources. []
[]
- o Exclude US Government systems processing collateral intelligence other than that noted in the preceding bullet (S)

25X1 3. Our near-term goal is to identify known or suspected vulnerabilities, assess the risk to sensitive operating systems, establish a sense of criticality for developing and applying procedural and hardware safeguards, and by doing so assure ourselves that the methods and sources as well as the intelligence itself are properly protected while supporting all vital operations. (S)
